

Siberian larch is very resinous and extremely hard wearing, making it one of the toughest and most durable softwoods in the world.

Siberian Larch benefits from impressive dimensional stability, low cost of installation, low maintenance and high manufacturing standards. However, the most amazing feature of Siberian Larch is its natural resistance to decay.

SIZE

SILA decking is supplied in various lengths from 2 – 6m. Please note that decking is supplied as a linear meterage based on random stock lengths at time of picking order. Other sizes may be available on request.
